

GOODNESS EFE

SOFTWARE DEVELOPER | FINAL-YEAR BSc (Hons) SOFTWARE DEVELOPMENT

Ennis, Co. Clare | 0892095987 | goodnessefe01@icloud.com | LinkedIn: [linkedin.com/in/efe-goodness-5b995b2a1](https://www.linkedin.com/in/efe-goodness-5b995b2a1) | GitHub: github.com/G00dzero

PROFILE

Final-year Software Development student at Technological University of the Shannon (TUS) with hands-on experience building console, desktop and web applications in C++, Java, C#, JavaScript and PHP. Strong foundation in object-oriented programming, databases, debugging and collaborative software development. Seeking a graduate/junior Software Developer role to contribute to production-focused projects and continue developing professionally.

TECHNICAL SKILLS

Languages: C++, C#, Java, JavaScript, PHP **Web:** REACT, HTML, CSS, JavaScript; frontend/backend integration **Database & Tools:** MySQL, Git/GitHub, Microsoft Office, Jira/Confluence **Core:** Object-Oriented Programming, Database Design, Algorithms, Debugging, Team Collaboration

PROJECTS

Claddagh Watch Patrol System — Group Project | Scheduling platform for Galway Suicide Patrol Watch

- Contributed to a team-developed system that enables Galway Suicide Patrol Watch to organise and schedule patrols, applying collaborative software development and requirements-focused problem solving.
- Worked within a shared codebase and project workflow, contributing to implementation, testing and integration of system functionality.

Meme Generator App — Java Swing | Group Project

- Developed desktop GUI functionality in Java Swing, including text overlays and image customisation.
- Implemented event-driven user interactions and applied object-oriented design to create an intuitive interface.

Verité Project — Web Application | github.com/G00dzero/verite

- Built a web-based project demonstrating frontend/backend integration, structured code organisation and practical UI implementation.

Rock Paper Scissors Game — C++ | github.com/G00dzero/Rock-Paper-Scissors-Game

- Implemented an interactive console game using conditional logic, input validation and random computer-generated moves, strengthening algorithmic problem solving.

EDUCATION

BSc (Hons) Software Development — Technological University of the Shannon (TUS Midwest), Ireland | Sept 2023 – Present

- Final-year study covering Data Structures, Database Systems, Networking, Web Development and Object-Oriented Programming.
- Technical focus: C++, C#, Java, JavaScript, PHP and MySQL.

EXPERIENCE

Catering Assistant — Supermac's, Ireland | Sept 2024 – Present

- Serve 100+ customers per shift in a high-volume environment while maintaining speed, accuracy and customer service standards.
- Process 100+ daily cash/card transactions and complete 20+ daily hygiene and compliance checks.
- Coordinate stock checks and restocking to maintain product availability during busy periods.

Kitchen Porter — BaxterStorey, Ireland | Mar 2024 – Sept 2024

- Maintained food-safety and sanitation standards during peak service periods and supported efficient kitchen workflow.

Sales Assistant — Chiopat Gadgets, Nigeria | Mar 2021 – Jun 2023

- Assisted 30–40 customers daily with mobile devices, accessories and gaming products; used targeted recommendations that contributed to a 10–20% increase in add-on purchases per shift.
- Tracked inventory across 30+ product categories, reducing stock discrepancies by 25%+ through accurate monitoring and reporting.
- Trained 3+ new staff members on sales techniques and customer-service standards.
